

POP-UP BOX

Children will be delighted the moment POP-UP BOX opens! They can create unique models with MAGFORMERS magnetic pieces and pyramid accessories, while experiencing many mathematical concepts.

711006 POP-UP BOX

NEW

MAGFORMERS is composed of polygons, which are the basis of many mathematical theories, to increase knowledge of shapes and develop a mathematical sense. MAGFORMERS POP-UP BOX includes triangle and square shaped magnetic pieces as well as pyramid accessories for fun activities with 2D or 3D pieces. Through a variety of activities with pyramid accessories, children can divide and combine models, improving spatial perception.

01 2D Puzzle

Recreate the objects around you with triangles and squares. Have fun making puzzles on top of the package with MAGFORMERS pieces.

02 3D Model

magnetic piece

magnetic piece + pyramid accessories

magnetic piece

magnetic piece + pyramid accessories

Recreate a variety of mathematical 3D shapes and the objects around you with 28 pieces. Use pyramid accessories to divide and combine models to improve spatial perception.

If we use pyramid accessories, we can create new shape models even on the same planar figure.
